<https://rafdev.netlify.app> | +1 647 936 9420

Software Developer certified in Web Development by the University of Toronto coding bootcamp, and with a certificate in Kubernetes awarded by Red Hat with training on the OpenShift technology. Successfully contributed to implementing innovative and effective solutions in the technology, television, and education industries, leveraging teamwork and leadership to achieve results. Proven track record of improving website traffic, boosting customer engagement, and enhancing user experience through both front-end and back-end technologies. Ready to leverage my skills and experience to drive business success as a developer in the tech sector.

SKILLS

Python, Node.js, MongoDB, MySQL, SQL, Microservices, Serverless, REST APIs, GraphQL, Kafka, HTML, HTML5, CSS, CSS3, JavaScript, DOM, jQuery, Bootstrap, Tailwind, REACT, Redux, Vue.js, Git, GitHub, GitLab, Heroku, Netlify, Docker, Kubernetes, OpenShift, Podman, VSCode, PyCharm, JupyterHub, S.O.L.I.D concepts of Object-Oriented Programming (OOP), MVC, Test-driven Development (TDD), SCRUM (Agile), MacOS, Linux, Windows, Computer Science, IT Support, Communication skills

PROJECTS

FPTV | TV Channel Website (<https://fptv.ca>)

Lead-generating web platform developed for the TV channel FPTV using HTML, CSS, and JavaScript. Employed git for source control to optimize the development process and attract new clients and subscribers.

FPTV | AdobePremiere-Recording-Automation (<https://bit.ly/AdobeAutoAHK> | <https://bit.ly/AdobeAutoPython>)

AutoHotKey and Python automation for Adobe Premiere Pro recording process. Customizable and streamlines workflow.

CLI Tool | README-generator (<https://github.com/rfabreu/README-generator>)

README-generator is a CLI utility tool built with JavaScript using the Inquirer library to assist developers to quickly generate professional README files.

CHARGE IT UP | ev-mapper (<https://github.com/rfabreu/ev-mapper> | <https://tarequem.github.io/ev-mapper/>)

Charge it up is an application that helps electric vehicle owners find charging stations near a postal code or zip code across North America. This project was built in collaboration with other developers using HTML, CSS, Tailwind framework and JavaScript, along with other APIs, such as NREL API, openweather API, and Bing Map API.

WORK EXPERIENCE

Full Stack Developer - Part-time

FPTV - Toronto, ON

April 2022 to Present

- Successfully developed the channel's website helping to convert leads into new clients and viewers
- Created automation workflow systems for Adobe Premiere Pro content recording, reducing manual and repetitive tasks, improving quality and allowing focus to be dedicated to creative work, and increasing cost-effectiveness by 43.2%
- Designed and implemented automated testing scripts for the live SMS system, ensuring system reliability and reducing the risk of human error

MCO - TV Production

FPTV - Toronto, ON

November 2016 to Present

Responsible for running the television channel's broadcasting operations:

- Supervised, trained, and mentored other broadcast technicians and team members to ensure success
- Created digital media content, sync and switch servers and satellites for broadcast and streaming
- Actively ran 20+ TV shows (newscast, talk shows, entertainment, sports, breaking news) with Canada wide viewership
- Effectively collaborated with teams of engineers, designers, producers, editors, clients, and stakeholders on a daily basis, and mentored and supervised other operators and production crew
- Implemented scalable solutions, most notably the NewTek TriCaster (TC-8000) used for live production broadcasting and streaming with virtual live sets, bringing considerable increase in quality standards and viewership to programs

Videographer

FPTV - Toronto, ON

April 2018 to Present

Operated motion picture and video cameras and related equipment to record news, live events, videos and television broadcasts:

- Supervised, trained, and mentored other videographers, leading to establish good team foundations
- Met with director and members of production crew to discuss assignment and determine filming sequences, camera movements and picture composition, delivering premium content as a result
- Set up, operated and troubleshooted a variety of TV production and broadcasting equipment
- Selected and set up camera equipment to be used and attach lens, filters and film magazine to camera, increased productivity by implementing new practices
- Applied procedures for adjustments in scene and camera settings for optimal results, helped increase quality by guiding crew to follow best practices and industry standards

Executive Assistant and IT Support

Impact Drywall Inc - Toronto, ON

August 2016 to November 2016

Worked closely with management to develop the business, and was responsible for the IT operations:

- Developed and managed the company's website using HTML, CSS, Bootstrap, and JavaScript
- Set up computers, networks, and implemented digital solutions
- Took charge in reviewing contracts, processing invoices, organizing payrolls, and recruiting new team members

IT Manager

Colégio Adélia Camargo Corrêa - Guarujá, SP

2013 to 2015

Managed the department of Information Technology working alongside the board:

- Onboarded and provided continuous professional development to 20+ staff members, and Managers resulting in a reduction in employee turnover rate and increase in goals success
- Developed and maintained major features of the company's web app using JS, HTML, CSS, Bootstrap and Joomla!
- Proposed and implemented scalable solutions to issues identified with the business development and technical areas of the IT department, including but not limited to: network and communication, computerized systems, remote environments
- Ran software and hardware management operations, including: research, acquisition, training, development, maintenance, support, scalability
- Worked alongside private school board and government officials to set technological ground to implement the VENCE program, which offered private professional education to lower income students at no cost to students and increased the number of paying students by 100%
